Section I. Microprobe facilities

Holistic design of a scanning nuclear microprobe
Grodzins, L., P. Boisseau, H. Glavish, R. Klinkowstein, W. Nett and R. Shefer 1
Aiming and hit verification in single ion techniques
Fischer, B.E. and S. Metzger. 7
The new nuclear microprobe at Livermore
Roberts, M.L., G.S. Bench, D.W. Heikkinen, D.H. Morse, P.R. Bach and A.E. Pontau 13
The new Heidelberg proton microprobe: The success of a minimal concept
Traxel, K., P. Arndt, J. Bohsung, K.-U. Braun-Dullaeus, M. Maetz, D. Reimold, H. Schiebler and A. Wallianos 19
The new Rossendorf nuclear microprobe
Herrmann, F. and D. Grambole 26
Operation of the new microprobe at Bochum
Stephan, A., J. Meijer, H.H. Bukow and C. Rolfs 31
The NAC nuclear microprobe facility
Prozesky, V.M., W.J. Przybylowicz, E. van Achterbergh, C.L. Churms, C.A. Pineda, K.A. Springhorn, J.V. Pilcher, C.G. Ryan, J. Kritzinger, H. Schmitt and T. Swart 36
Submicron microbeam apparatus using a single-ended accelerator with very high voltage stability
Kamiya, T., T. Suda and R. Tanaka 43
Analysis of iron by PIXE using heavy ion microprobes
Horino, Y., Y. Mokuno, N. Tsubouchi, A. Kinomura, A. Chayahara and K. Fujii 49
Three-dimensional surface analysis system using a compact nuclear microprobe
Kishimoto, T., R. Mimura, H. Sawaragi, R. Aihara and M. Takai 52
Damage of polyimide thin films irradiated by MeV proton microbeams
Kinomura, A., Y. Horino, Y. Mokuno, A. Chayahara and K. Fujii 55

Section II. Microbeam formation

Experimental compensation of parasitic octopole aberrations in small-bore quadrupole lenses
Martin, F.W. and R. Goloskie 59
Optimal non-linear, orthomorphic, magnetic quadrupole lens systems for ion microprobes
Dymnikov, A.D., D.N. Jamieson and G.J.F. Legge 64
Some possibilities of nuclear microprobe focusing system improvement
Brazhnik, V., V. Khomenko, S. Lebed and A. Ponomarev 69
Wide-range scanning and lens correction of an ion microprobe
Meijer, J., A. Stephan, H.H. Bukow, C. Rolfs and F. Bruhn 77
Quantitative analysis of large sextupole fields in a magnetic quadrupole lens
Breese, M.B.H. and D.N. Jamieson 81
Grid shadow pattern analysis of the Shanghai nuclear microprobe
Jamieson, D.N., J. Zhu, Y. Mao, R. Lu, Z. Wang and J. Zhu 86

Numerical optimization of magnetic nonlinear quadrupole systems in an ion microprobe with given spot size on the target
Brazhnik, V.A., A.D. Dymnikov, D.N. Jamieson, S.A. Lebed, G.J.F. Legge, A.G. Ponomarev and V.E. Storizhko 92
Experimental test of an achromatic quadrupole lens doublet – Aberration coefficients of second degree in ion energy at the operating point
Martin, F.W. and R. Goloskie 95
The effect of external fields and slit scattering on the beam spot profile of the coupled triplet system
Watt, F., T.F. Choo, K.K. Lee, T. Osipowicz, I. Orlic and S.M. Tang 101

Section III. Data handling and probe control

Recent developments in data acquisition and processing on the Oxford scanning proton microprobe
Grime, G.W. and M. Dawson 107
Integrating microprobe laboratory automation with high speed data acquisition and analysis
Moloney, G.R., P.M. O'Brien, A. Saint, L. Witham, A. Sakalleriou, A. Bettiol and G.J.F. Legge 114
An integrated computer system for fudan nuclear microprobe
Zhou, D., C. Ren, J. Tang and F. Yang 119
Computer controlled specimen stage goniometer for a nuclear microprobe
Jamieson, D.N. and W.A. Belcher 124
A VMEbus data acquisition and analysis system for the KFUPM scanning nuclear microprobe
Abdel-Aal, R.E., J. Nickel and M. Garwan 130

Section IV. Microprobe analytical techniques

Analytical techniques in nuclear microprobes
Malmqvist, K. 138
Limits of detection for PIXE analysis using proton microbeam
Jakšić, M., I. Bogdanović and S. Fazinić 152
A new method for on-line true-elemental imaging using PIXE and the proton microprobe
Ryan, C.G., D.N. Jamieson, C.L. Churms and J.V. Pilcher 157
Reference materials and calibration standards for nuclear microprobe work
Wätjen, U. and A. Plompen 166
Simulation of RBS spectra for quantitative mapping of inhomogeneous biological tissue
Moretto, P. and L. Razafindrabe 171
Investigation of Ni hyperaccumulation by true elemental imaging
Przybyłowicz, W.J., C.A. Pineda, V.M. Prozesky and J. Mesjasz-Przybyłowicz 176
Microanalysis of ore-forming fluids using the scanning proton microprobe
Ryan, C.G., C.A. Heinrich, E. van Achterbergh, C. Ballhaus and T.P. Mernagh 182
Quantitative PIXE and micro-PIXE analysis of thick samples at Fudan University
Dai, Z., C. Ren, W. Ni and F. Yang 191
TTSPM: a new computer program system for quantitative thick target analysis by nuclear microprobe
Wu, X., J. Zhu, R. Lu and F. Yang 196
Preparation of standard samples and standard reference materials for microbeam analysis
Hanru, S. and X. Qing 201

Section V. Microprobe imaging techniques

Imaging with high velocity focused ion beams
Legge, G.J.F., A. Saint and M. Cholewa 204
Applications of ion-beam tomographic element microanalysis (ITEM)
Schofield, R.M.S. 212

PIXE tomographic reconstruction of elemental distributions using an iterative maximum-likelihood method
Liew, S.C., I. Orlic and S.M. Tang 222
Deconvolution of one-dimensional microprobe scans using the nonlinear Jansson method
Coote, G.E. and B.P. Kwan 228
Application of transmission ion channeling to the imaging of stacking faults
King, P.J.C., M.B.H. Breese, P.R. Wilshaw and G.W. Grime 233
Image processing for nuclear microprobe at Fudan university
Zou, D., C. Ren, S. Zhou, J. Tang and F. Yang 238

Section VI. Microprobe analysis of light elements

Analysis of light elements with a nuclear microprobe–A review
Demortier, G. 244
Nuclear reaction analysis of boron for microbeam analysis of medical samples
Sjöland, K.A., P. Kristiansson and P. Tallone 255
Microbeam recoil detection for the study of hydration of minerals
Sie, S.H., G.F. Suter, A. Chekhmir and T.H. Green 261
Light elements analysis using ^{3}He microbeam
Terwagne, G., F. Bodart, B. Blanpain, H. Mohrbacher and J.-P. Celis 266
The characterization of glass inclusions through nuclear microprobe
Mosbah, M., R. Clocchiatti, N. Métrich, D. Piccot, S. Rio and J. Tirira 271

Section VII. Applications to life sciences

Nuclear microscopy in the life sciences
Watt, F. 276
Cell biology, trace elements and nuclear microscopy
Lindh, U. 285
Nuclear microanalysis of platinum and trace elements in cisplatin-resistant human ovarian adenocarcinoma cells
Moretto, P., R. Ortega, Y. Llabador, M. Simonoff and J. Bénard 292
External beam analysis of living sycamore xylem infected by pathogenic fungi
Grime, G.W. and R.B. Pearce 299
Nuclear microprobe analysis of chlorine distribution in the blue-light-exposed rat retina
Chen, E., J. Pallon and B. Forslind 306
PIXE microanalysis of trace elements of the normoxic, ischemic and reperfused rat heart
Verhoef, B.A.W., P.M. Frederik, P.H.H. Bomans, G.J. van der Vusse, P.H.A. Mutsaers, E.C.P. de Lepper and M.J.A. de Voigt 311
Investigation of the uptake of drugs, carcinogens and mutagens by individual mammalian cells using a scanning proton microprobe
Cholewa, M., I.F. Turnbull, G.J.F. Legge, H. Weigold, S.M. Marcuccio, G. Holan, E. Tomlinson, P.J. Wright, C.T. Dillon, P.A. Lay and A.M. Bonin 317
Ion dynamics in cells – preparation for studies of intracellular processes
Pålsgård, E., G. Roomans and U. Lindh 324
Study of some analytical-methodological aspects in nuclear microprobe analysis of soft biological tissues
Van Lierde, S., W. Maenhaut, J. De Reuck and R.D. Vis 328
Proton microprobe studies of fluorine distributions in mollusc shells
Coote, G.E. and W.J. Trompetter 333
Proton microprobe study of radiation exposure induced changes in hair
Bogdanović, I., M. Jakšić, S. Fazinić, J.W. Hopewell, J.H. Wilkinson and V. Valković 339
A view on elemental distribution alterations of coronary artery walls in atherogenesis
Pallon, J., P. Homman, T. Pinheiro, M.J. Halpern and K. Malmqvist 344

Elemental mapping analysis of recurrent calcium oxalate human kidney stones
Pineda, C.A., A.L. Rodgers, V.M. Prozesky and W.J. Przybylowicz 351
Nuclear microscopy of atherosclerotic tissue
Watt, F., M. Selley, P.S.P. Thong and S.M. Tang 356
Nuclear microscopy in Parkinsons disease
Watt, F., T. Lee, P.S.P. Thong and S.M. Tang 361
A quantitative study of elements in the blood cells of the tropical ascidian *Phallusia philippinensis* using the nuclear microscope
Thong, P.S.P., N.C. Law, I. Orlic, D.J.W. Lane and F. Watt 365
Nuclear microanalysis of the human amnion: A study of ionic cellular exchanges
Razafindrabe, L., P. Moretto, Y. Llabador, M. Simonoff, M. Bara and A. Guiet-Bara 370

Section VIII. Applications to earth and planetary sciences

The nuclear microprobe as a probe of earth structure and geological processes
Ryan, C.G. 377
The nuclear microprobe used to investigate meteorites
Vis, R.D., A.C. Kik and J.L.A.M. Kramer 395
Micron scale investigation of marine ores by nuclear microprobe technology
Zhu, J., C. Yang, R. Lu, K. Sheng, Y. Wang, N.P.-O. Homman and K.G. Malmqvist 402
Diagenetic history of sedimentary carbonates: Constraints from combined cathodoluminescence and trace element analyses by micro-PIXE
Bruhn, F., P. Bruckschen, D.K. Richter, J. Meijer, A. Stephan and J. Veizer 409
PIXE profiling, imaging and analysis using the NAC proton microprobe: Unraveling mantle eclogites
van Achterbergh, E., C.G. Ryan, J.J. Gurney and A.P. Le Roex 415
Diagenetic alteration of calcitic fossil shells: Proton microprobe (PIXE) as a trace element tool
Bruckschen, P., F. Bruhn, J. Meijer, A. Stephan and J. Veizer 427
Nuclear microprobe analysis of Evate (Mozambique) apatites
Utui, R.J., N.P.-O. Homman, C. Yang, K.G. Malmqvist and S.S. Tembe 432
SPM study on the distribution of Carlin-type gold mineral deposit in China
Zhou, S., C. Ren, J. Tang and F. Yang 437
Quantitative micro-PIXE analysis of Yanzhuang meteorite
Wu, X., J. Zhu and Z. Li 445
True elemental imaging of pyrites from Witwatersrand reefs
Przybyłowicz, W.J., V.M. Prozesky and F.M. Meyer 450
Mapping the Earth's mantle in 4D using the proton microprobe
Griffin, W.L., C.G. Ryan and T.T. Win 456
Mineralogical evidence for the origin of mafic microgranular enclaves in S-type granites and volcanics
Elburg, M.A., I.A. Nicholls and S.H. Sie 464
Immiscible silicate liquids at high pressure: The influence of melt structure on elemental partitioning
Vicenzi, E., T.H. Green and S.H. Sie 470
Selenium and its importance to the study of ore genesis: the theoretical basis and its application to volcanic-hosted massive sulfide deposits using pixeprobe analysis
Huston, D.L., S.H. Sie and G.F. Suter 476
Micro PIXE and micro SXRF: comparison of the two methods and application to glass inclusions from Vulcano (Eolian Islands – Italy)
Mosbah, M., R. Clocchiatti, V. Michaud, D. Piccot, P. Chevallier, F. Legrand, G. Als Nilsen and G. Grübel 481
Comparison of quantitative PIXE and EPMA microanalysis of mineral samples
Dai, Z., C. Ren, J. Zhang, G. Ma and F. Yang 489
A PIXE, EPMA and SIMS study of the Chainpur meteorite: small grains of lead found in a chondrule
Kramer, J.L.A.M., A.C. Kik and R.D. Vis 494

Section IX. Applications to microelectronics

Applications of nuclear microprobes to semiconductor process developments
Takai, M. 501
Effects of micro-beam induced damage on single-event current measurements
Hirao, T., I. Nashiyama, T. Kamiya and T. Nishijima 508
Optimization of buried implanted layer in dynamic random access memories by soft error mapping and ion beam-induced current
Kishimoto, T., H. Sayama, M. Takai, Y. Ohno, K. Sonoda, T. Nishimura, A. Kinomura, Y. Horino and K. Fujii 515
The study of the structural stability of multilayer systems by RBS and PIXE microbeam methods
Šandrik, R., V. Boháč, K. Nakamura, A. Ishi, I. Orlić, S.M. Tang and F. Watt 519
Nuclear microprobe analysis of implantation damage induced by focused gallium ion beams in GaAs
Takai, M., S. Hara, T. Kishimoto and J. Yanagisawa 524
Study of basic mechanisms of single event upset in low-capacitance Si and GaAs diodes using high-energy microbeams
Nishijima, T., H. Sekiguchi, S. Matsuda, M. Takeuchi, N. Shiono, H. Anayama and A. Morio 528

Section X. Applications to materials and metallurgical sciences

Applications of focused MeV ions to materials modification and analysis
Jamieson, D.N. 533
Nuclear microprobe local characterization of YBaCuO superconductors
Berger, P., B. Berthier, G. Revel and P. Trocellier 542
Nuclear microprobe study of the leaching behaviour of sintered UO_2 in groundwater
Trocellier, P., J.P. Gallien and C. Cachoir 547
Localized depth distribution in the bombarded surface of Ag–Cu alloy
W. Wang, Z. Wang, R. Lu, F. Zhu, X. Wu, Y. Guo and J. Zhu 552
Analysis of the distribution of trace elements in nodular cast iron by SPM
S. Feng, M. Ren, M. Zhong, J. Zhu, C. Yang, R. Lu, N.P.-O. Homman, K. Malmqvist, Y. Wang and Q. Han 557
Nuclear microscopy of Fe substituted 2212 BiSrCaCuO superconducting crystals
Lee, K.K., D.N. Jamieson and F. Watt 561
Study of 3C-SiC crystal defects by microbeam channeling methods
Sekiguchi, H., T. Nishijima, I. Nashiyama, S. Misawa and S. Yoshida 566
Behaviour of thin films and bulk oxides under microbeam irradiation
Trocellier, P. 571

Section XI. Applications to arts and archaeology

Review of the recent application of the Nuclear Microprobe to art and archaeology
Swann, C.P. 576
The Lund nuclear microprobe in newsprint research
Kristiansson, P., L. Malmqvist, K.A. Sjöland and G. Sunnerberg 584
Nuclear microscopy of rubies: trace elements and inclusions
Osipowicz, T., T.S. Tay, I. Orlic, S.M. Tang and F. Watt 590
Precious metals assay by means of microbeam XRF technology
Lu, R., A. Le, Y. Gu, G. Wu and J. Zhu 595

Section XII. Applications to environmental sciences

The nuclear microscope: A review of applications in the environmental sciences
Orlic, I. 602

A study of *M. margaritifera* shells from the River Paulisträmsån, S. Sweden
Nyström, J., U. Lindh, E. Dunca and H. Mutvei 612
Quantitative micro-PIXE and micro-probe analysis of ostracode shells to reconstruct the paleoenvironment
Dai, Z., C. Ren, Q. Zhao, P. Wang and F. Yang 619
Occurrence mode of major and trace elements in individual fly-ash particles
Cereda, E., G.M. Braga Marcazzan, M. Pedretti, G.W. Grime and A. Baldacci 625
The microanalysis of individual aerosol particles using the nuclear microscope
Orlic, I., T. Osipowicz, F. Watt and S.M. Tang 630
Trace element concentration and distribution in ivory
Prozesky, V.M., E.J. Raubenheimer, W.F.P. Van Heerden, W.P. Grotepass, W.J. Przybylowicz, C.A. Pineda and R. Swart 638

Section XIII. Summaries of the workshops

Summary of the workshop "what are the ultimate limits to high-energy ion beam diameter"?
Martin, F.W. 645
Summary of the workshop on microbeam resolution measurement
Watt, F. 647
Summary of the workshop on micro-ion beam damaging
Cholewa, M. 649
Summary of the workshop on the grid shadow method
Jamieson, D.N. 650

Author index 653
